Apply Styling and Template Inheritance

Reindert-Jan Ekker

AUTHOR TITLE

@rjekker www.codesensei.nl

Overview

Add styling: CSS

Apply styles to the whole site
- Jinja inheritance
- Makes HTML cleaner

Demo

Create a CSS stylesheet

Apply CSS to HTML

Jinja inheritance

- Apply CSS everywhere
- Restructure HTML code

Jinja template Inheritance

```
<!-- Include all HTML from the parent template

    (This should be the first tag! -->
{% extends "base.html" %}

{% block block_name %}

    This replaces the content of the block

    with the same name
{% endblock %}
```

Static Files and url_for

```
<!DOCTYPE html>

<html lang="en">

<head>

    <link rel="stylesheet"

     href="{{ url_for( 'static', filename='style.css' ) }}">
```

Summary

Add styling: CSS

– Static files and url_for

Apply styles to the whole site

– Jinja inheritance

– Makes HTML cleaner
